

LECA[®] M AND LECA[®] L - LANDSCAPING SOLUTION (50L BAGS)

Leca[®] M and Leca[®] L has been used within horticulture for many years and we have now launched our material 50L lightweight and easy to pour handy bags - suitable for all gardeners. This is the perfect alternative to traditional potting soil, offering effective water retention and efficient air to the root - providing nutrients to plants in the process.

Solutions

This is an organic product which is re-usable and contains no herbicides - offering a long lasting and green substitute for soil. This is suitable for large or small and compact gardens and is highly suitable for use in-doors. Through effective water retention and lightweight properties, Leca[®] M and Leca[®] L - Landscaping Solution (50L bags) provides a perfect solution for effective plant growth.

Leca[®] M and Leca[®] L - Landscaping Solution (50L bags) mixed in the soil at a 1:3 ratio provides a good porous mixture, ideal for a natural root development that improves plant growth.
