

PRESTON WESTERN DISTRIBUTOR ROAD (PHASE 2: SAVICK BROOKE VIADUCT)

PRESTON WESTERN DISTRIBUTOR ROAD (PHASE 2: SAVICK BROOKE VIADUCT)

LECA® lightweight fill is currently being installed for the Savick Brooke Viaduct section of the new Preston Western Distributor Road (PWDR) project.

This £200m scheme is being undertaken by Costain Group PLC on behalf of Lancashire County Council and will link North West Preston and the Fylde to the M55 motorway.

Over 2400m³ of LECA® Lightweight Fill is being used for the next bridge abutment section of the development, providing a lightweight solution offering robust stability over delicate ground conditions.

This new development is set to open in early 2023.
