## What is Leca® Chimney & Flue Backfill?

Leca® is a lightweight, ceramic aggregate produced by heating glacial clay in a rotary kiln.

Leca® has a unique cellular inner structure which provides excellent insulating qualities Leca® is non – hazardous, inert & is resilient to attack from chemicals, hydrocarbons, and extreme high & low temperatures.

Leca® is not affected by water and unlike other backfill material it will not clog when wet.

## Leca® Chimney & Flue Backfill is quick and easy to install

Simply pour the Leca® into the void between chimney & flue liner either straight from the bag or using a bucket or filler for smaller apertures.

Fill with Leca® to just below top of the chimney prior to fitting capping or cowl.

## What are the benefits of insulating with Leca® Chimney & Flue Backfill?

- Hotter gases and improved chimney draw
- Increased flue efficiency
- Reduction of heat loss
- Better fuel economy
- Prevents condensation
- Significant reduction of tar deposits
- Increased flue life span
